First, connect to the cdu-guest network
(from a PC)

1. Go to the wireless control panel window in your computer. You might find it in the system tray (bottom right of the screen next to the clock), or in the control panel.
   a. For the system tray, right click the wireless network icon and select View Available Network Connections.
   b. For the control panel, go to: start>settings>Network Connections>Wireless Network Connection.

You should have a screen that looks like this.

Click the CDU-GUEST network, and click “Connect”
(From a Mac)

1.) Make sure that your wireless is turned on

2.) Select the cdu-guest network.
3.) Once you are connected to the cdu-guest network open a web browser and you will see the screen below

4.) Select “New Guest Users” to register an account

5.) Accept the agreement and hit continue
6.) Now you will enter your new account information

Email Address: Enter your email address such as an @msn.com, yahoo.com, gmail.com

Password: Enter a password of your choice.

Confirm Password: enter password again.
Purpose: i.e. Student, contractor, etc.

Company: If you are a contractor or visitor, please enter what company you are with.

7.) Once you have completed filling in your information, hit continue and you will go back to the login screen. Your email address should already be in the field.

8.) Enter your password and hit continue to access the internet. You will receive a message letting you know that you have successfully logged into the guest wireless. Either hit your home button to go to your home page or enter an address in the address bar to surf the net.

Guest accounts remain valid for 7 days. You can use the same username and password to login directly within that period.
