The Radiologic Technology Program has been continually accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT) since 1975. The JRCERT affirms that the accreditation process offers both a means for public assurance of a program meeting accreditation standards and a stimulus to programmatic improvement. The program effectiveness data is available on the JRCERT website at http://www.jrcert.org and on the program website.

The JRCERT standards for an accredited educational program in radiologic sciences require the program to demonstrate clarity and appropriateness of its purpose as a postsecondary educational program; to protect learner and public; to demonstrate adequate human, financial, and physical resources effectively organized to accomplish those purposes; to document its effectiveness in accomplishing its purposes; and to provide assurance that it can continue to meet accreditation standards.
